USDA to Invest up to \$225 Million in Partner-Driven Conservation on Agricultural and Forest Land

LITTLE ROCK, AR, Jan. 13, 2022 – The U.S. Department of Agriculture today announced up to \$225 million in available funding for conservation partners through the Regional Conservation Partnership Program (RCPP). RCPP is a partner-driven program that leverages collective resources to find solutions to address natural resource challenges on agricultural land. This year’s funding announcements include opportunities for projects that address climate change, benefit historically underserved producers and support urban agriculture.

“RCPP is public-private partnership at its best,” said Natural Resources Conservation Service (NRCS) Arkansas State Conservationist Mike Sullivan. “We’re harnessing the power of partnership to create lasting solutions to global challenges, like climate change, and support producers and communities who have been underserved in the past.”

There are two types of funding opportunities under RCPP: RCPP Classic and RCPP Alternative Funding Arrangements (AFA). RCPP Classic projects are implemented using NRCS contracts and easements with producers, landowners and communities, in collaboration with project partners. Through RCPP AFA, partners have more flexibility in working directly with agricultural producers to support the development of new conservation structures and approaches that would not otherwise be available under RCPP Classic. Project types that may be suited to AFA, as highlighted by the 2018 Farm Bill include:

- Projects that use innovative approaches to leverage the federal investment in conservation.
- Projects that deploy a pay-for-performance conservation approach.
- Projects that seek large-scale infrastructure investment that generate conservation benefits for agricultural producers and nonindustrial private forest owners.

USDA is accepting project proposals for both components of RCPP through 11:59 p.m. on April 13, 2022. View the funding opportunity on [grants.gov](https://www.grants.gov) for [RCPP Classic](#) and [RCPP AFA](#).

Additionally, a webinar with general program information for RCPP applicants is scheduled for 3-4:30 p.m. ET on Jan. 20, 2022. Visit the [RCPP website](#) for information on how to participate.

Helping People Help the Land

USDA is an Equal Opportunity Provider and Employer

Funding is open to agriculture and silviculture associations, non-government organizations, Indian tribes, state and local governments, conservation districts and universities, among others.

Partners are expected to offer value-added contributions to amplify the impact of RCPP funding in an amount equal to or greater than the NRCS investment.

Private landowners can apply to participate in an RCPP project in their region through awarded partners or at their local [USDA service center](#).

More Information

First authorized in the 2014 Farm Bill, RCPP has leveraged partner contributions of more than \$1 for every \$1 invested by USDA, resulting in nearly \$3 billion collectively invested in natural resource conservation on private lands. Since inception, RCPP has made 579 awards involving over 3,000 partner organizations. Currently there are 408 active projects, with at least one active project in every state and area. Successful RCPP projects provide innovative conservation solutions, leverage partner contributions and offer impactful and measurable outcomes.

Today's RCPP announcement builds on other efforts by the Biden-Harris Administration to address climate change. Earlier this week, NRCS announced a new [Cover Crop Initiative](#), available through the Environmental Quality Incentives Program (EQIP) to help agricultural producers mitigate climate change through the widespread adoption of cover crops. NRCS also announced the signup for [EQIP Conservation Incentive Contracts](#) and [an improvement to the Conservation Stewardship Program](#) (CSP).

Last week, USDA's Risk Management Agency (RMA) announced details of the new [Post Application Coverage Endorsement](#), providing coverage for corn producers who "split apply nitrogen," a more conservation friendly way to apply fertilizer.

USDA touches the lives of all Americans each day in so many positive ways. In the Biden-Harris Administration, USDA is transforming America's food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America.
