Set post into the ground at minimum of 36 inches without concrete.

OR

Set post into the ground at minimum of 24 inches with concrete.

Double H brace in-line assemblies are required in straight sections of the fence line where the distance between pull posts of corner brace assemblies and/or end panel brace assemblies exceeds 1,320 feet for standard fences.

Double H brace in-line assemblies are also required where an upward angle will require additional embedment to properly anchor the upward pull of the stretched wire. Changes in slope exceeding 8% are to be considered for this type of brace assembly. The center post of this brace assembly will be set as near the point where the slope breaks as possible.

6-10 feet horizontal brace with 1 1/2” standard weight steel pipe cross member.

2 1/2” minimum standard weight steel pipe or minimum 2 3/8” drill stem pipe.

Single H brace end panel assemblies are required where fences end and on both sides of gate opening where the pull is only one direction.

Change in elevation greater than 8%

Double H brace corner brace assemblies are required at all points where the fence alignment has a change of 20 degrees or more and the pull is from two directions.

Change in direction of 20 degrees or more.
