Single Post Brace for Electric Fence

Single post brace for electric fences are required where an upward angle will require additional embedment to properly anchor the upward pull of the stretched wire. Changes in slope exceeding 8% are to be implemented for this type of brace assembly. The center post of this brace assembly will be set as near the point where the slope breaks as possible.

Changes in elevation greater than 8% are to be implemented for this type of brace assembly. The center post of this brace assembly will be set as near the point where the slope breaks as possible.

Direction of Pull

Single Post Corner Brace for Electric Fence

Single post corner brace for electric fences are required at all points where the fence alignment has a change of 20 degrees or more and the pull is from two directions.
